EXPERIENCE

Trainee PHP Developer

Mehta WebSolution

📅 Jan 2021 – Sep 2021 📍 Jamnagar, Gujarat, India

- Trained in Core PHP, OOP concepts, MySQL, and Laravel fundamentals with hands-on project work.
- Developed responsive UI using HTML5, CSS3, Bootstrap, and JavaScript.
- Implemented AJAX-based features using jQuery for dynamic page updates.
- Used Git for version control and collaborated on shared code repositories.
- Performed debugging and basic unit testing using Chrome DevTools and PHPUnit (basic).

PHP Web Developer

Mehta WebSolution

📅 Sep 2021 – Jun 2022 📍 Jamnagar, Gujarat, India

- Developed and maintained full-stack web applications using PHP, MySQL, and JavaScript.
- Built CRUD modules, form validation, and backend business logic using OOP principles.
- Implemented AJAX workflows to improve user experience and reduce page reloads.
- Redesigned legacy websites to responsive layouts using Bootstrap.
- Participated in cross-browser testing and bug fixing in Agile-based development cycles.
- Contributed to Laravel-based modules for authentication and admin dashboards.

Software Engineer

Surekha Technologies

📅 Jun 2022 – Jul 2023 📍 Ahmedabad, Gujarat, India

- Worked on Moodle-based learning management systems including UI customization and backend component development.
- Developed scalable web modules using PHP, MySQL, JavaScript, and jQuery.
- Implemented OAuth2 authentication with Google and Microsoft for secure login.
- Collaborated in Agile teams for feature delivery, bug fixing, and release cycles.
- Improved application usability through UI redesign and performance optimization.
- Gained exposure to Linux shell scripting for deployment and server-level operations.

CAREER OBJECTIVE

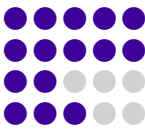

Full Stack PHP and Laravel Developer with 2 years of experience and an MBA in Information Technology Management, combining strong web development skills with AI-driven data analysis and business understanding. Experienced in building scalable web applications, RESTful APIs, and integrating machine learning features such as sentiment analysis into real-world systems. Seeking a role where I can contribute to intelligent web products, bridge business and technology needs, and grow into a techno-functional leadership position.

SKILLS

- PHP Laravel Python MySQL
- REST API Development
- MVC Architecture CRUD Operations
- HTML5 / CSS3 JavaScript AJAX
- Git & GitHub Postman
- Database Design SDLC
- Agile (Scrum Basics)
- Business Requirement Analysis
- Machine Learning Basics
- NLP (Sentiment Analysis)
- Problem Solving Team Coordination
- Stakeholder Communication

Career Break

Health Recovery, MBA, and Skill Development

-  Jul 2023 – Jan 2026
-  Jamnagar, Gujarat, India
- Completed MBA in Information Technology Management, gaining knowledge in IT strategy, project management, and business analysis.
 - Recovered from medical treatment while maintaining continuous learning discipline.
 - Strengthened Python and Machine Learning skills through certifications and hands-on projects.
 - Built AI-based systems including Resume Screening, Sentiment Analysis for blog comments, and Face Recognition Attendance System using OpenCV.
 - Integrated ML models with web interfaces using Flask/Django and REST APIs.
 - Actively preparing for roles in AI-enabled web development and techno-functional positions.

Operations Executive

Excel Technical Services

-  Jan 2026 – Present
-  Jamnagar, Gujarat, India
- Managed inventory and maintained digital records using Excel.
 - Prepared reports and documentation for project operations.
 - Coordinated with technical and site teams for project updates.
 - Handled data entry, documentation and reporting tasks.
 - Assisted in basic system and computer-related operations.
 - Maintained database records and file management.

PROJECTS

AI-Integrated Blogging Platform with Sentiment Analysis (Laravel + Python)

- Developed a blog web application using Laravel with AI-based sentiment analysis on user comments.
- Integrated Python NLP model (Transformers pipeline) via REST API to classify comments as Positive, Negative, or Neutral.
- Built admin dashboard for moderation insights and content performance tracking.
- Technologies: Laravel, Python, Transformers, REST APIs, MySQL, JavaScript

Inventory Management System for Warehouse Operations (Laravel)

- Designed and developed an Inventory Management System for small-to-medium warehouses with centralized authority.
- Implemented stock tracking, material in/out reports, and role-based access control.
- Improved operational visibility and reduced manual record maintenance.
- Technologies: Laravel, MySQL, HTML/CSS, JavaScript

E-Commerce Web Application (Laravel)

- Built a full-featured e-commerce platform with product listing, search, cart, and order management.
- Implemented user authentication, secure checkout workflow, and customer reviews.
- Designed database schema for scalable product and order handling.

EDUCATION

Master of Business Administration - MBA, Information Technology.

Jain (Deemed-to-be University)

 Jul 2023 – Jul 2025

CGPA: 8.64

B.E.

Marwadi Education Foundation-Faculty of PG Studies and Research in Engineering and Technology, Rajkot

 Jun 2014 – Oct 2020

CGPA: 6.61

Overall Percentage: 61%

HSC (Higher Secondary)

Shri P.V. Modi High Schools, Jamnagar

 2012 – 2014

Overall Grade: C2

Percentage: 51.38%

SSC

Nand Vidya Niketan, Jamnagar

 2011 – 2012

Overall Grade Point(GP): 6.0

CERTIFICATES

Python Bootcamp

Udemy

 Completed: June 2024

Skills: Python, OOPS in Python, Data Structures, Algorithms, File Handling, Error Handling, Libraries (NumPy, Pandas, Matplotlib), Web Scraping, GUI Development (Tkinter), API Integration

Hands-on Approach to AI for Real-World Applications

TCS iON

 Completed: November 2024

Skills: Python, Pandas, Machine Learning, NumPy, Natural Language Processing, Python (Programming Language)

PHP Certification

TestDome

 Completed: May 2021

Skills: PHP programming, problem-solving, and application development

- Technologies: Laravel, MySQL, JavaScript (AJAX), HTML/CSS

Tutor Freelancing Platform for Teachers and Parents (Laravel)

- Developed a service marketplace where teachers register subjects, availability, and experience.
- Parents can search for tutors, track student progress, and manage enrollment details.
- Focused on scalable database design and secure user authentication.
- Technologies: Laravel, MySQL, JavaScript, jQuery

AI-Based Resume Screening System (Machine Learning)

- Built ML model using Python and Scikit-learn to shortlist resumes based on job relevance.
- Implemented NLP keyword extraction and similarity scoring.
- Integrated with web interface for HR candidate filtering.
- Technologies: Python, Scikit-learn, NLP, Flask, MySQL

Face Recognition Attendance System (Computer Vision)

- Developed face recognition system using OpenCV and FaceNet for automated attendance.
- Trained on custom dataset of student/employee images.
- Generated attendance reports for administrative use.
- Technologies: Python, OpenCV, FaceNet

Master Of Business Administration (Information Technology Management)

Jain (Deemed-to-be University)

📅 Completed: November 2025

Skills: IT Project Management, Software-Development Life Cycle, Agile Scrum Methodology, Business Process Analysis, IT Strategy & Planning, Risk Management in IT projects, Vendor & Stakeholder Management, Digital Transformation Basics
